Digital Air Washer

Touch Panel with cleaning mode

Digitally control humidity levels with the programmable hygrostat. Set humidity levels from 30% to 70% or for continuous use. Other digital features include a hygrometer, automatic shut-off, cleaning indicator and Ionic Silver Stick exchange reminder. The cleaning mode guarantees convenient decalcification of the Air Washer.

Humidification and cleaning (2 in 1)

The Air Washer cleans and humidifies the air in the self-regulating process of evaporation by using special humidifier discs. These discs have a great adhesion for water to guarantee high humidity output. Special airflow allows for ultra-quiet operation. The Air Washer offers two power modes for normal and night use.

No filters or additives required

The special humidifier discs with scoop ribs for optimal humidification never need replacing. No additional filters are necessary. The Air Washer removes impurities such as dust, pollen and particle-bound odours from the air naturally, without the use of any additives.

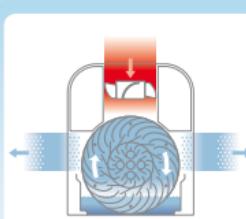

Anti-microbial protection system (ISS)

The newly developed Ionic Silver Stick (ISS) keeps the water fresh thanks to an innovative system, which efficiently eliminates odour-causing bacteria. The ISS utilises the anti-microbial property of silver and provides up to a season's worth of optimal water quality maintenance in all AIR-O-SWISS and BONECO humidifiers. The ISS works even when the humidifier is switched off.

Ideal for allergy sufferers

Permanent, self-rinsing humidifier discs turn through the water cleaning airborne particles captured by the discs, like fresh rain cleans outdoor air - naturally (ideal for allergy sufferers). Operates effectively with all degrees of water hardness.

System description

Dirty, dry air enters an AIR-O-SWISS and BONECO Air Washer and clean, healthy air is emitted throughout your room. Even allergy sufferers can breathe easily. This 2 in 1 Humidifier and Purifier is equipped with permanent humidification discs with no filters that require replacement. Due to its cleaning function and self-regulating humidification it is suitable for operation throughout the whole year.

Technical specifications

Mains voltage	230V / 50 Hz	Dimensions	336 x 323 x 407 mm
Power consumption	18 W	Weight (empty)	6.0 kg
Humidity output up to	300 g/h	Operation noise level	< 25 dB(A)
Suitable for rooms up to	50 m ² / 125 m ³	Accessories	Ionic Silver Stick® (ISS) CalcOff A7417
Water capacity	7.0 litres
